1)For NO contacts,measured when applying 100% rated voltage on coil.

For NC contacts,measured when applying zero voltage on coil.

2)Inrush peak current under amp load,at 13.5VDC.

3)1min, leakage current less than 1mA.

4)The value is measured when voltage drops suddenly from nominal voltage to 0 VDC and coil is not paralleled with suppression circuit.

5)When energized, opening time of NO contacts shall not exceed 1ms, when non-energized,opening time of NC contacts shall not exceed 1ms, meantime, NO contacts shall not be closed.

6)FMVSS:Federal Motor Vehicle Safety Standard.

7)Since it is an environmental friendly product, please select lead-free solder when welding.The recommended soldering temperature and time is (250±3)C,(5±0.3)s.

8)Only valid for QC version.

9)Test point is at 2mm away from terminal end,and after removing testing force, the terminal transfiguration shall not exceed 0.5mm.

10) Only for the 12VDC coil voltage type.

11)Do NOT knock on relays with hard objects such as rubber rod and rubber hammer during mounting, which might lead to relay damage.
